

## Complete Supply Solutions

We offer our customers end-to-end support, from R&D through to volume production. Beyond the best components for your applications, we provide you with expert assistance in integrating this technology into world-changing new products.

## Value Added Services

Key to our success has been the development of our Value Added Services - going above and beyond our core business of component distribution to offer a comprehensive range of technical, commercial, value-added, training and support services.

- Sourcing & Obsolescence Solutions
- Optoelectronics & Sensors Design & Manufacture
- End-to-End IoT Solutions
- 4G/5G Router Configuration Service & Consultancy
- Device Programming
- Firmware Version Control
- Custom Gapped and Machined Ferrite Cores
- Tape & Reel and Mini Reel
- Bake & Seal

Services are carried out in our secure, bespoke facilities with ESD protected areas, in line with our **AS9100D** certification. UK warehousing and multiple logistics services ensure on time delivery through buffer stocks, consignment stocks and VMI programmes. The Quality Management Systems of our Design & Manufacturing facilities are accredited to **ISO 13485**.

## Quality

A focus on quality has always been important for Solsta. We believe there are huge benefits for companies committed to a quality ethos throughout their business.

Our aim is to make even the smallest process reliable and robust, and we employ quality management tools to provide a framework for collecting and analysing data to this end.

The quality certifications and accreditations listed below represent recognised industry benchmarks, and provide assurance of our capabilities to maintain robust and reliable processes and procedures.

## Solsta is a world-leading electronic component distributor and a catalyst for technological innovation.

We help the electronics community solve the problems that can't be solved alone, drawing on unmatched technical knowledge, connections and entrepreneurial spirit.

Innovation with integrity is our passion and our purpose. As such, we operate at the heart of the electronics community, as the trusted partner for our customers and suppliers. We are the vital component.

### Premium Product Portfolio

We distribute a wide range of best-in-class semiconductors and related components and modules from a carefully selected stable of leading edge suppliers. Our portfolio contains the components you need to unlock vital innovation in your concepts and designs.

**Hi-Rel Solutions** are available in all product areas for demanding applications and harsh environments.

### Custom Solutions

Where there is no off-the-shelf solution, Solsta offers a custom design and build service for optoelectronics, sensing and display technologies. We can help you develop a bespoke component, module or assembly, with capabilities from die attach and wire bond right up to turn-key, programmed systems.
